## PowerBuilder Developer

Contractor

6 month Contract: \$37,000

**Position Description:** Responsible for the design and development of client/server case managements systems. This is a 6 month contractor position with possible extension.

**Education and Experience:** The candidate will have at least a bachelor's degree in Computer Science or the equivalent related work experience.

### **Preferred Knowledge/Skills/Abilities:**

- Requires full life cycle development experience with PowerBuilder.
- Requires strong Oracle PL/SQL skills in creating SQL, Packages, Procedures, Functions, and Triggers
- 5 years experience in Database Applications Development
- Possess knowledge of structured programming and relational database constructs
- Ability to interpret business rules and software requirements, and translate them into program logic
- Perform unit tests for programs and software applications to be sure they will produce the desired information and that the instructions are correct
- Prepare documentation of program development and subsequent revisions, inserting comments in the coded instructions so others can understand the program
- Ability to define external functions in PowerBuilder to use Oracle stored procedures
- Prepare and submit monthly progress report
- Good listening and communication skills
- Works well in a team environment

### **Bonus Skills**

- Dynamic SQL
- Tuning SQL
